

E.R. 5. 6364
1200/S - 1-2574

15 August 57

Mr. Allen W. Dulles, Director
Central Intelligence Agency
2430 "F" Street, N.W.
Washington 23, D. C.

Dear Mr. Dulles:

I would like to extend a cordial invitation to you and members of your staff to attend the Annual Conference on the Development of Science by means of which will be held 1-4 October in Washington, D.C., at the Department Auditorium at 12th Street and Constitution Avenue.

These symposia afford an opportunity for our scientists and engineers to present papers to a distinguished and critical audience on promising work under way in the Air Force Command.

The chairman this year will be Dr. George E. Clegg, Chief Scientist of the U. S. Air Force. Dr. Hugh Dryden has accepted our invitation to deliver the keynote address. Included in the audience will be members of the research and development staffs of the Department of Defense, the U. S. Air Force, and other government agencies, together with a broadly representative group from ARDC.

The agenda will include papers classified to ~~High Secret~~ Restricted Data. The physical and security arrangements detailed in the inclosed data sheet together with titles from which our agenda, consisting of 111 items, will be selected.

We are hoping that the schedule will permit all parts of us in Washington in October.

Sincerely,

J.E. Anderson
Lieutenant General, USAF
